

A BRONCHIAL COUGH

is wearing and dangerous because the inflamed, mucus-filled tubes interfere with breathing and the fresh air passes through that unhealthy tissue.

Probably no other remedy affords such prompt and permanent relief as **Scott's Emulsion**; it checks the cough, heals the linings of the throat and bronchial tubes and strengthens the lungs to avert tuberculosis. This point cannot be emphasized too strongly—that **Scott's Emulsion** has been suppressing bronchitis for forty years and will help **you**.

Be careful to avoid substitutes and insist on **SCOTT'S**.

**Save the Difference!**

Why throw away your coal range when you can have it exchanged for natural gas range. We do this. And we handle nothing but the best ranges and heaters—Clark Jewel and Wilson. They are guaranteed to consume less fuel than any stoves made. The Clark Jewel has no competition as a baker and cooker. The Wilson heaters give more heat than any stove ever sold.

We carry the largest line of Gas Fixtures, Heaters, Ranges and Gas Grates of any firm in Lexington. We save you from 25 to 50 per cent. on anything in the gas line. We own our own business house and have no rent to pay, therefore can undersell the other fellow and make as much profit as the man who is in the high rent district. See us before you make any purchases and you will realize why our motto is **SAVE THE DIFFERENCE**.

Between Main and Short**SPECIAL****Brass Grates, \$6.00**The Kind that Sells Everywhere From
\$8.00 to \$12.00**HEAD OF FACTORY WHERE
30 LOST LIVES PENNILESS.**

After handling \$200,000 worth of business a year for thirty-three years, Reed B. Freeman, head of the Binghamton Clothing Co., at Binghamton, New York, in whose factory thirty girls were burned to death July 22 last, will begin life anew in a New York commission house.

"I have kept nothing," Freeman said. "Every church within 100 miles of Binghamton has benefited from my charity and every charitable institution within this district. The losses of the fire above the insurance were heavy; but I have paid every creditor dollar for dollar. It was right and I feel easy in my mind as I begin life anew. If I had my money back I would give it to restore life to the girls burned in the fire."

THRILLING PICTURES

A complete and vivid pictorial record of the ill-fated Scott expedition to the South Pole will be projected upon the screen at the Ben Ali Theatre, in Lexington, the week commencing Monday afternoon, October 20, with matinee daily.

It is said that Herbert G. Ponting, who took these pictures, caught every phase of the animal life of the Antarctic, and many facts about the habits of the seals, the killer whales, the penguins and the skua gulls never before known are revealed by the camera.

A huge Weddell seal is shown sawing a groove in the ice for its body with its teeth. Scientists have heretofore wondered how these trougl-like cuttings in the ice were made.

A thrilling scene which quickly develops into a tragedy is one which shows a school of killer whales pursuing a mother seal and her calf. The mother, racing at top speed, manages to spring out of the water on to the ice floe, but the baby is unable to make this haven of safety. The mother can be seen frantically trying to aid the baby to climb upon the floe, when in her desperation she plunges into the water almost into the wide-open jaws of the killer whales.

The penguins afford no end of amusement by their queer antics as the lecturer explains, they resemble ever so much certain obese human beings, and as they go tottering over the ice they look for all the world as if they were clothed in hobbie skirts. They never run for any considerable distance but after gaining a certain floor upon the ice and their bodies give over its smooth surface as if they were toboggans.

Another unique and interesting film shows the actual hatching of a skua gull's egg, the chick being seen in the very act of breaking through the shell.

The wondrous beauty of the Antarctic is revealed by all the pictures. Mount Erebus in active eruption is shown, although it had to be photographed from a distance of fifteen miles. Mr. Ponting used a telephoto lens in making this picture, which is as clear as a crystal, and the volcano looks to be only one hundred yards distant.

The pictures also show that Captain Scott's expedition was not a wild dash to the Pole but the greatest scientific investigation that was ever made of a polar region. The different scientists are followed by the camera as they test the upper air currents with balloons, or try the temperature of the deep waters of the sea with finely graduated thermometers, or trawl the bottom of the ocean for rare marine animal life.

Running through the entire exhibition are views of Capt. Scott himself, and of the four heroes who perished with him on the return journey from the Pole. The dog teams, the motor sledges, the tent in which they sought shelter from the cold at night, the very sleeping bags that afterward became their shrouds are all shown; and every detail is explained in a comprehensive lecture.

It is said that these films are the property of the widows and orphans of the "Immortal Five" who gave their lives for the furtherance of science; and a goodly part of the proceeds is devoted to their personal benefit. (adv)

**NOVEMBER 6 DESIGNATED
KENTUCKY ARBOR DAY.**

Governor McCreary issued the following proclamation designating November 6 as Arbor Day in Kentucky:

"I, James B. McCreary, Governor of the Commonwealth, do issue this proclamation, designating Thursday, November 6, 1913, as Arbor Day for the Commonwealth of Kentucky, and request its observance by the planting of trees and such other exercises as may be deemed proper.

"The attention of all the people, especially the teachers and pupils of all the colleges and schools, is called to the importance of planting trees. Every proper effort should be made for the renewal of our forests.

"In the last decade there has been great development along forestry lines in the United States. The inauguration of forest management in the national forests, the activity of various States in public forestry, and the interest of private owners in tree growing, have resulted in marked improvement in everything connected with forestry. There are now a number of colleges in the United States where forestry is included in the curriculum. In the last few years there has been a constantly increasing activity in the forestry of the various States, and now thirty States have some kind of organization for forestry work.

"I call upon the people to give more attention to the observance of Arbor Day in Kentucky than has been given heretofore. I not only desire the students of all the colleges to take an active interest in the setting out of trees but the pupils of every common school in the State could render immense service by each one of them setting out a tree on Arbor Day.

"Schoolhouse yards, home yards, public roads, pastures and fields should be beautified with trees. Our natural forests are diminishing, and we must reforest the cut-over, the burnt-over and the unreforested districts of the State.

"In testimony whereof I have caused these letters to be made patent and the seal of the Commonwealth to be hereunto affixed. Done at Frankfort the fourteenth day of October, in the year of our Lord one thousand nine hundred and thirteen, and in the one hundred and twenty-second year of the Commonwealth.

"By the Governor,
JAMES B. MCCREARY."

THEY MAKE YOU FEEL GOOD

The pleasant purgative effect produced by Chamberlain's Tablets and the healthy condition of body and mind which they create make one feel joyful. For sale by all dealers. (adv) (Oct)

**BULLETIN OUT FOR
NEGROES OF STATE.**

A bulletin, the first of its kind, for the exclusive benefit of the colored schools of the State, has been prepared by C. L. Timberlake, messenger of the Department of Education and a prominent negro educator, and issued by Superintendent of Public Instruction Barksdale Hamlett. Superintendent Hamlett says, by way of introduction:

"The issuance of this little bulletin is somewhat of a departure from the regular order, but, recognizing the great need of more interest among colored people of our State along the lines of agriculture and domestic science, we have encouraged and to a certain extent, supervised the efforts of the author in the preparation of this work."

The bulletin is entitled "Household Ethics and Industrial Training," and contains, besides arguments in favor of more concrete expression in the curriculum of the need of the colored race for training in agriculture, domestic science and home-making, suggestions to the teacher for practical training in cleaning house, setting and serving the table, cooking, agriculture and manual work in the farm shop.
